Welcome Message

Dear colleagues, partners, and friends,

It is with great pride and renewed ambition that we welcome you to this official booklet of MoroccoSim, the Moroccan Society for Simulation in Healthcare. Since our foundation in 2015, MoroccoSim has grown into a vibrant, inclusive, and forward-thinking community. We bring together healthcare professionals, educators, students, and innovators who believe that simulation is not just a training method, it is a powerful tool to enhance patient safety, transform education, and inspire collaboration.

In just a few years, we have launched national simulation events such as SimCup, hosted international congresses including HTIC, and established 14 clubs and 6 committees dedicated to advancing simulation-based education across Morocco. We have also developed educational masterclasses, organized international e-conferences, contributed to the edition of scientific journals, and published national guidelines to support the growth of simulation in healthcare. Our SHINE pillars, Simulation, Healthcare, Innovation, Networking, and Education, guide every initiative we undertake. Today, Morocco Sim stands on the dedication of passionate members, visionary leaders, expert educators, and countless volunteers who continue to shape its identity and impact nationally and internationally. And we are only at the beginning of this journey.

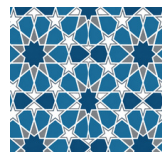

This booklet reflects our story, our achievements, and our ambitions. Whether you are a future member, a seasoned professional, a curious student, or a potential sponsor, we invite you to join us in this journey. Together, we can build a safer, smarter, and more human-centered healthcare system.

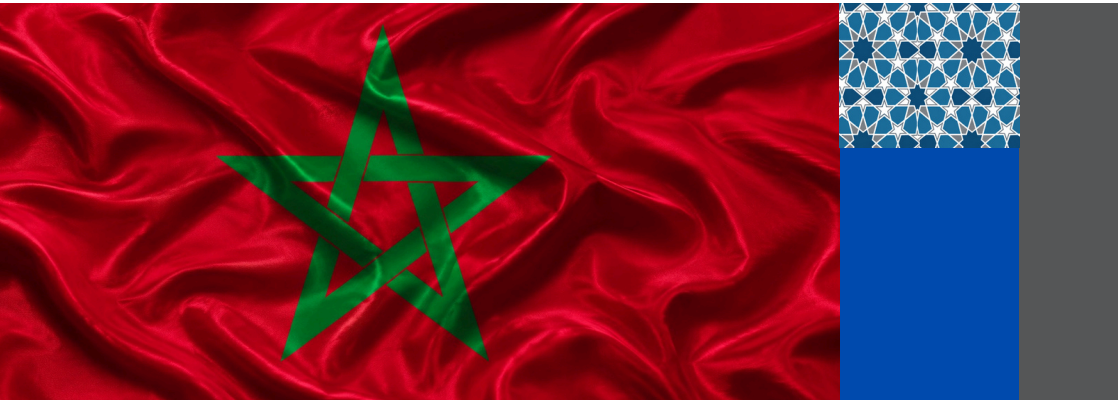

With warm regards,

President of MoroccoSim

On behalf of our 2500+ members

Pr. Mohammed Mouhaoui

Vision & Mission

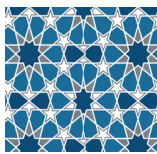

→ Vision

Morocco Sim is committed to promoting and advancing healthcare simulation as a powerful driver of educational excellence, innovation, and patient safety. Through training programs, scientific research, national and international partnerships, and the organization of leading scientific events, Morocco Sim supports healthcare professionals, institutions, and students in the continuous development of clinical, technical, and human competencies for better patient care.

→ Mission

Morocco Sim aspires to become a leading international reference in healthcare simulation across Africa, the Arab world, and beyond. The society promotes an innovative vision of health sciences education where simulation, artificial intelligence, immersive technologies, and pedagogical innovation contribute to transforming healthcare training and improving patient care.

Through international collaboration, interdisciplinary projects, research, and knowledge sharing, Morocco Sim aims to build a dynamic ecosystem connecting universities, hospitals, experts, industry partners, and students around one shared ambition: training better to care better, while positioning Morocco as a regional hub for innovation in healthcare simulation and medical education.

Committees & Clubs

Morocco Sim is structured around a dynamic network of committees and thematic clubs that actively contribute to the society's growth and impact. These groups bring together professionals, educators, researchers, technicians, and students working collaboratively on scientific activities, educational innovation, research, communication, international partnerships, simulation operations, and event organization.

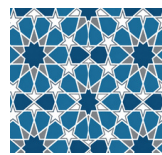

Through its specialized clubs and working groups, Morocco Sim promotes leadership, creativity, interdisciplinary collaboration, and active engagement, while fostering a vibrant community dedicated to advancing healthcare simulation and patient safety at national and international levels.

Healthcare Training International Conference

The HTIC Healthcare Training International Conference is an annual flagship event organized by MoroccoSim, in collaboration with one of the Kingdom of Morocco’s leading faculties of health sciences. This high-impact gathering brings together a diverse community to explore the foundations and future of healthcare simulation, educational innovation, and research.

With a strong emphasis on fundamental sciences, digital health, and AI-enhanced pedagogy, HTIC aligns with Morocco’s national vision to advance medical education reform and optimize both initial and continuing training in the health sciences.

Each edition features dynamic programming across 15 parallel thematic tracks, delivered by renowned national and international experts. The conference attracts a wide and multidisciplinary audience : educators, physicians, dentists, pharmacists, nurses, engineers, healthcare managers, biomedical professionals, and students in health sciences.

Simcup

Simcup is an academic and interprofessional healthcare simulation competition designed for students in medicine, pharmacy, and health sciences. Created in Morocco in 2014, it blends simulated clinical scenarios, hands-on challenges, and innovative tasks. Evolving from a local event into a national and now international competition, Simcup has become a flagship model of active learning.

Originally focused on emergency and critical care, it has expanded to include clinical reasoning, soft skills, moulage, medical imaging, virtual surgery, OSCEs, and more. Celebrated for promoting interprofessional collaboration and educational excellence, Simcup gained international recognition when the Moroccan team won gold at a global simulation competition in Prague (2019). Today, it stands as a regional benchmark in simulation-based education.

Training & Simulation For Patient Safety International e-Conference

This conference, supported by the scientific societies affiliated with Morocco Sim, brings together leading experts, educators, healthcare professionals, researchers, and innovators from around the world to explore the latest advances and best practices in healthcare simulation and patient safety. Through conferences, interactive discussions, workshops, and networking opportunities, the program promotes knowledge exchange, interdisciplinary collaboration, and professional development in a dynamic international environment.

By creating a space for scientific dialogue and educational innovation, the conference reflects the shared commitment of Morocco Sim and its affiliated societies to advancing simulation-based education, improving healthcare quality, and strengthening patient safety at both regional and international levels.

Join Us for 200 MAD/Year

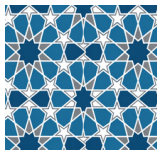

Morocco Sim is open for membership. Any individual interested in the fields of health sciences education is welcome. Membership covers a calendar year. The membership fee is 200 DH per year (20 € or \$20), for all categories.

➔ Why Join ?

- Official member status of Morocco Sim,
- Preferential registration rates for the annual meeting and various scientific events organized by Morocco Sim,
- Privileged and comprehensive access to the various sections of the website www.moroccosim.org,
- Free subscription to the electronic version of the Morocco Sim Journal,
- Free access to the various webinars organized by Morocco Sim,
- Eligibility to apply for the board, committees, and clubs of Morocco Sim,
- Benefit from the advantages offered to members of affiliated societies.
